

INSTRUCTIONS: NEUTRAL DENSITY BAR

The filters are marked: Equate to Neutral

Density	Log Units
03	0.3
06	0.6
09	0.9
12	1.2
15	1.5
18	1.8

Blotch marks may appear due to the interference phenomena when gel filters in proximity to the plastic sheet cause an air pocket. These do not affect the light transmission of the filter and therefore the function is unaffected. The air pockets may come and go with any change of temperature and humidity.
